### Psychology Day

15th Annual UN Psychology Day was celebrated on April 21, 2022 to share the activities of psychologists at the U.N. and the role of psychology in addressing concerns of global importance. The American Psychological Association (APA) has recognized the third week in April as "Psychology Week," with the aim of raising the profile of the discipline and profession of psychology and celebrating its many contributions in society towards improving lives.

The Department of Applied Psychology, KNU is also joining hands with the support from the professionals engaged across West Bengal to celebrate this occasion. We would particularly like to listen on motivation, inspiration and expectations of the very young people who have chosen psychology as their professional subject. We hope listening accounts of these early-age psychologists will provide new insight about the **beginning of psychologist in current time.**
